

# Providing comfort whatever happens

# Be prepared for rising medical costs

With rapid advances in medical research and treatments, the chances of surviving a serious medical condition like cancer or a heart attack are now very high. However, the costs associated with treatment have also risen significantly. MetLife's Critical Care plan provides critical financial support in times of great stress resulting from a critical illness and enables you and your family to continue living comfortably.

## Have you considered:

- what would happen if you are no longer able to work and support your family?
- if a critical illness would compromise your lifestyle and financial stability?
- if you can afford the medical expenses and support to survive a critical illness?

A medical bill can go beyond your financial means. It is therefore important to set aside a little of your savings to get the coverage that you and your loved ones need.

## Facts and Statistics<sup>1</sup>

- 1 in 5 people will suffer from a serious illness at some stage in their life
- 1 in 8 people will contract cancer before age 65
- 80% of all heart attack victims survive
- 70% of people will survive a stroke
- Open Heart Surgery may cost over USD 50,000<sup>2</sup>
