

Protection with saving potential

Protection with saving potentials

Securing your family's future and dreams is a big responsibility. While it's not an easy task, we all need to plan for our future and for the future of our families in case we are no longer here to provide for them. With Future Protect, you can provide your loved ones with a lifetime of financial security. By combining the benefits of life insurance with an investment feature, Future Protect allows you to enjoy the best of both worlds.

How the plan works

You can customise your Future Protect life insurance plan with these options:

- Choose a coverage amount that best suits your needs.
- Select between a single or joint life insurance coverage.
- Enhance your plan with additional life insurance benefits such as accidental loss of life, critical illness benefits and more.
- Contribute to the plan by selecting the investment strategy that best suits your circumstances and the currency of your choice (USD, GBP or Euro). Payments can be made monthly, quarterly, semi-annually or annually.

Commit to the plan

Now that Future Protect is personalised to your preferences, all you need to do is keep it in force and enjoy the peace of mind that comes with knowing that you are covering your family with the life insurance benefit this plan provides.

Benefits of Future Protect

Life insurance benefit

Life insurance is a very important aspect that contributes to your family's safety net. In the event of your unfortunate loss of life, it would help make up for your lost income, fund your child's education and settle any outstanding payments. Future Protect also allows you to choose between a single or joint life cover. With a life insurance coverage of up to USD 50 million, you can be assured that your dependents will be able to maintain their lifestyle.

Single life cover

In the unfortunate event of the loss of life of the Insured, the beneficiary (ies) will receive the selected life insurance benefit or the account value; whichever is higher.

Joint life cover

Future Protect allows you to opt for a joint life insurance cover. You can either select:

- **First loss of life:** In the regretful event where one of the joint insured passes away, the beneficiary(ies) will be entitled to the life insurance benefit or the account value; whichever is higher. The policy will be terminated once any of the joint insured passes away.
- **Both loss of life:** In the unfortunate event where one of the joint insured passes away, the beneficiary(ies) will receive the deceased's share of the life insurance benefit and the policy would continue.

Investment opportunity

Future Protect offers you the chance to reach your desired savings objectives through access to various investment strategies.

Your investment choices

Depending on your risk appetite you can choose to have your contributions allocated to one of our investment strategies: **conservative**, **balanced** and **aggressive**.

The conservative strategy

Designed for customers who are focused on minimising losses, who are not prepared to take significant investment risks.

The balanced strategy

Designed for customers who are focused on capital preservation / modest capital growth and prepared to accept a medium level of investment risk.

The aggressive strategy

Designed for customers who are focused on capital growth and prepared to take significant investment risk.

Maximum flexibility

The beauty of Future Protect is your ability to tailor your investments to your constantly changing needs and market conditions. To leverage on favourable market conditions or to protect your account value from potentially significant market fluctuations, you have the ability to:

- move one investment account to another.
- increase your contributions up to 10 times your annual premium (minimum USD 250 per annum*).

*Note: Limits on premium increase are determined by MetLife and may change over time.

Access to cash should you need it

It's always reassuring to know that you can access money quickly should the need arise. With Future Protect, withdrawals or partial surrenders can be made at any time after the initial payment period, subject to terms and conditions.

Note: Surrender charges may apply and accessing cash will reduce your account value and coverage.

Valuable optional insurance protection

Enhance your plan by opting for additional benefits. To ease the financial burden on you and your family, your contributions towards any additional benefits will be deducted from your account value. You can elect to add:

Critical Illness: Upon diagnosis of any of the 32 covered critical illnesses, MetLife will promptly pay a lump sum payout of up to USD 1 Million to help you afford a host of expenses like medical co-pays, lost income, home healthcare needs or your childcare expenses.

Accidental Loss of Life: In the event of loss of life due to an unfortunate accident, your loved ones will receive a lump sum payout up to USD 5 Million to ensure they are in a position to maintain their standard of living.

Permanent Total Disability: At any given age, the chances of an accident leading to permanent total disability are much higher than the odds of losing a life. This benefit will help you avoid severe financial problems by allowing you to:

- Meet your financial commitments through guaranteed cash payments of up to USD 2 million
- Receive your Permanent Total Disability (PTD) benefit as following:

Period of PTD (consecutive)	Percentage of PTD Benefit
6 months	20%
12 months	30%
24 months	50%

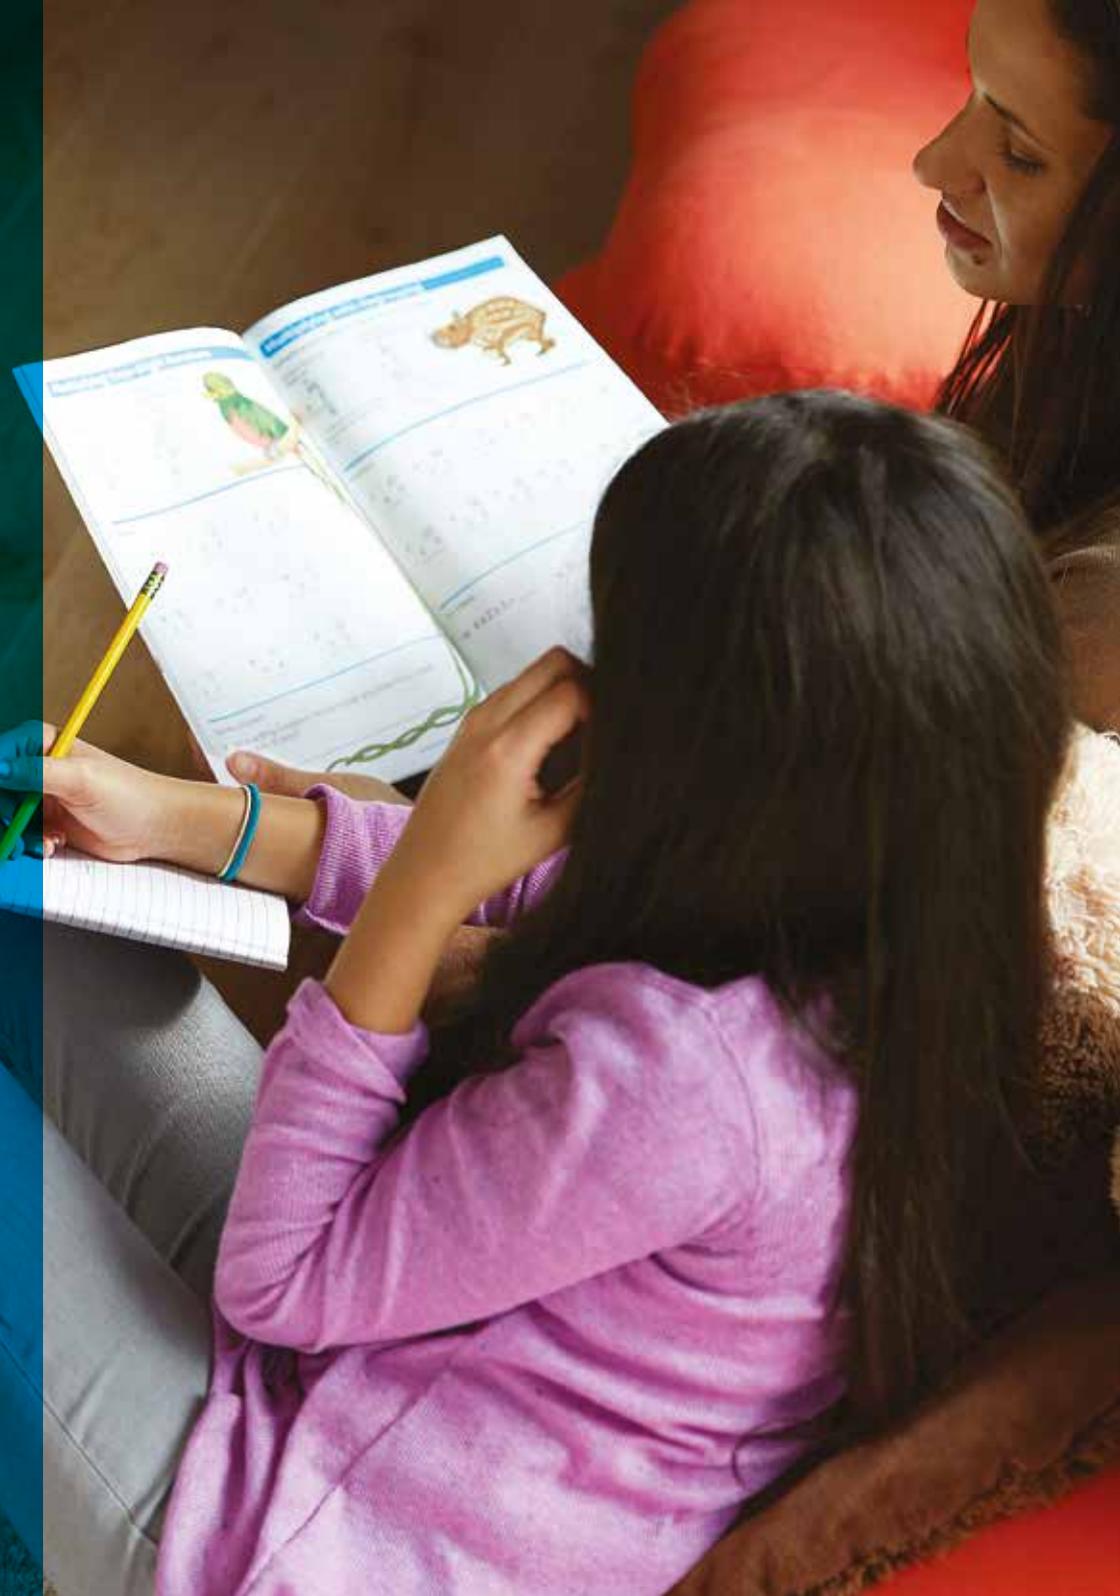

Waiver of premium on loss of life and disability:

MetLife will waive all the remaining premiums payable by you to guarantee that the plan remains in force and that the goals remain unaffected in case of disability of the insured (provided that he/she is the policy owner) and disability or loss of life of the policy owner (provided that he/she is not the insured).

Valuable pension benefit

Instead of receiving your account value in a lump sum, you may choose to receive a regular monthly income for your lifetime. The monthly income will be paid to you for as long as you live and in the regretful event of your loss of life during the guaranteed 20 years' period, your dependents will continue to receive your monthly income for the remainder of the period. While the plan matures at age 95, you can apply for the pension benefit until age 65.

Stories like yours

With a new baby girl on the way and with the cost of living rising, young couple, Marwan and Dana, realised that they would need to secure everything they have worked for over the years to ensure that their child's future and standard of living would not be affected in case of unexpected events.

In order to protect their new growing family, they decided to take up a Future Protect policy. By contributing with USD 1,800 a month, their payments will be invested in the investment accounts they have selected after 2 years and they will be ensured life insurance coverage of USD 450,000.

Here are scenarios for each life insurance option they can opt for:

If single life cover is selected:

Dana, as a beneficiary, would be entitled to the full life insurance amount or the account value (whichever is higher) in the unfortunate event of Marwan's loss of life.

If joint life cover with a first loss of life is selected:

Marwan and Dana have to specify the amount each would receive in the event that one passes on before the other. If out of USD 450,000, Marwan is covered for USD 300,000 then Dana's coverage will be USD 150,000. In case Marwan passes away first, Dana, as a beneficiary, will receive USD 300,000 or the account value (whichever is higher); or vice-versa.

If joint life cover with both lives is selected:

Similar to the previous scenario, the amount of life cover on each insured member has to be specified. Assuming that the specified life insurance amounts are similar to the previous scenario, if Marwan passes away first, the beneficiary, his child in this case, will receive USD 300,000 or the account value at that time (whichever is higher). The policy will not be terminated and will continue as normal. The child will receive the balance of the life insurance or the account value once Dana passes away or at the maturity of the policy.

MetLife will charge VAT on all UAE policies which are subject to value added tax ("VAT") in accordance with the provisions of UAE Federal Law No. (8) of 2017 on VAT.
